

Contract ID Validation Job Aid

New functionality within NC E-Procurement includes a validation that will automatically occur when an **Agency Specific Contract ID** is entered when adding a Non-Catalog Item. If the validation finds that the entered Contract ID resembles a **Statewide** or **IT Convenience** Contract ID, a warning message will be displayed indicating that an update to the **Contract Type** or **Contract ID** may be necessary.

- 1. If the 'Contract' field is set to 'Agency Specific' and the 'Contract ID' entered resembles a Statewide or IT Convenience Contract ID, a warning message will be displayed indicating which Contract Type the entered Contract ID resembles.
- 2. To resolve the warning message in the pictured scenario, change the value in the 'Contract' field to 'Statewide'.
- 3. Once the 'Contract' field is set to 'Statewide', the warning message will no longer appear.

Note: In the pictured scenario, the validation found that the Contract ID entered resembles a **Statewide** Contract ID number. The warning message indicates that, "The value entered in the Contract ID field matches a Statewide Term Contract. Please verify the value selected for the Contract Type field is correct." If the warning message indicated that the Contract ID entered resembled an **IT Convenience** Contract ID, the user would need to change the value in the **'Contract'** field to **'IT Convenience'** to resolve the warning message.
